PROFESSIONAL SUMMARY

Backend-focused Python/Django developer who enjoys building practical and reliable backend systems. Experienced with APIs, database design, automation, and clean backend logic. Looking for a junior backend role to work with Python, Django, REST APIs, and MySQL while improving through real-world projects.

CORE SKILLS

- **Backend:** Python, Django, Django REST Framework, API Development, Authentication (Token/JWT)
- **Database**: MySQL, Django ORM
- **Frontend Basics**: HTML, CSS
- **Tools:** Git, GitHub, Postman, VS Code, Linux basics
- **Other:** Problem-solving, debugging, clean and readable code

PROJECTS

Skill-Based Job Recommendation Engine — Python, Django, DRF, MySQL

- Built APIs for users, skills, and job listings.
- Created simple scoring logic to match user skills with job requirements.
- Used MySQL + ORM for filtering and storing jobs.
- Returned clean JSON responses showing matched & missing skills.

Automated Task Scheduler & Execution Engine — Python, Django, Cron

- Developed cron-based task execution system.
- Logged each run (success/error/time/output).
- Built APIs to create, trigger, and manage scheduled tasks.

EDUCATION

- MCA — Pursuing
- BCA — S.K. College, Akola

HIGHLIGHTS

- Regular practice on Python & DSA (GFG,LEETCODE)
- Strong interest in backend development
- Quick learner with consistent discipline
- Focus on clean and simple architecture
